McNealy Brown LIMITED

Northern Line Extension

FLO | £2,900,000.00 | 2021

McNealy Brown successfully completed the fabrication and installation of key metalwork items for the Northern Line Extension. The package included:

- Glazed Balustrade
- Handrails & Railings
- Gates & Ladders
- Platforms & Flooring

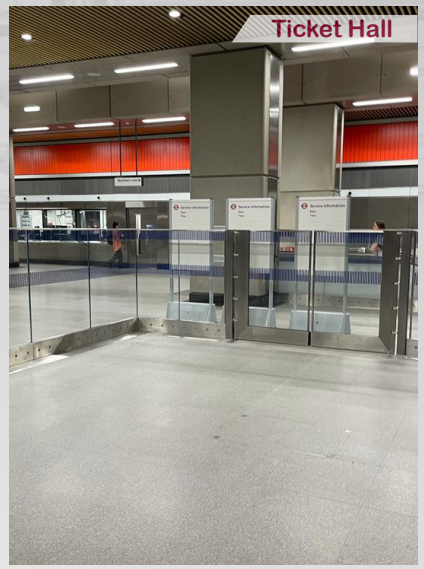

McNealy Brown were responsible for progressing the design from RIBA stage 4 to RIBA stage 5 whilst maintaining the clients original design intent.

The safe and timely installation of these works allowed for the two new Tube Stations, Battersea Power Station and Nine Elms, to open for the public in September 2021.

The Northern Line Extension is set to improve transportation to South London and support thousands of jobs and homes.
