McNealy Brown LIMITED

Bond Street Station

Costain Skanska JV | £5,500,000.00 | 2017-2022

Bond Street Station has undergone some major works in the last few years to improve accessibility and increase capacity across the Jubilee, Central and Elizabeth Lines.

McNealy Brown had the opportunity to assist with the design, fabrication and installation of several front and back of house items including, supporting steel work frames, service risers, balustrades, handrails, platform end cages, ladders, access stairs and lifting beams to several lifts. The non-public platforms also feature a mesh security fencing which was especially ordered and shipped from Italy.

By the end of the project, McNealy Brown has installed well over 200 work items over the span of the 5 years working on this project. The station opened its doors to the public October 2022.

"It is much appreciated and once again, on behalf of the team at Bond Street, many thanks – this is why we keep (and we'll keep), relying on McNealy Brown!"

Package Manager

"Just a note of thanks to yourself and the McNealy Brown team for once again taking on the challenges thrown at you and delivering. It is very much appreciated by the project."
