CAD Technician / Draughtsman

Main Responsibilities:

- To produce fabrication and construction drawings for architectural and structural steelwork using AutoCAD 2D and 3D Inventor and Advance Steel Software.

Main Tasks:

- To analyse the content of specifications, site surveys and design drawings and produce working design solutions to enable the safe and accurate manufacture and installation of steelwork.
- To liaise with delivery teams and, on occasion, customer representatives.
- To attend site to carry out site surveys, to secure dimensional and structural information to be used in the production of drawings.
- To assist with the identification of elements contributing towards cost with a view to suggest alternatives to reduce costs and/or improve quality or efficiency.

Candidate Requirements:

- To have experience in using Autodesk software packages (AutoCAD 2D, Inventor and Advance Steel).
- To have knowledge and experience of the technical elements of the architectural steel fabrication and installation industry, particularly materials and manufacturing techniques.
- To have good accurate numeric skills and ability to undertake a reasonable level of technical calculations.
- To have a good understanding of Microsoft Excel and Word.

This position is based in our offices in Sittingbourne, Kent. This is intended to be a full time, permanent role of 45 hours per week. Salary is subject to knowledge and experience.
